Source
URI / publisher
Artifact
Captured bytes / SHA-256
Passage
Text / locator
Information lineage is supplied or inferred separately from byte identity.
Claim / mention
Statement + scope
Assertion ≠ event
Evidence assessment
Relation + rationale
Acceptance provenance
Verification result
Scope + cutoff + state
Retain unknown/conflict
Source dependency families
Copies may share one root
Unknown linkage ≠ independence
Superseding assessment / finding
Preserve earlier record; validate references
No physical truth inferred from a valid ID
