IncidentSpec + budgets
Optional collection execution
Fixed Source Watch
Capture → bridge → ledger
Pretyped local inputs
Explicit files + cutoff
Structural report gates
References / hashes
Cutoffs / frozen controls
Offline analytical stages
Retrieve / organize / summarize
Unknowns remain explicit
Report input bundle
Findings / assessments
Separately supplied
Demonstrated boundary: scripted / integrated bounded workflow (levels 1–2)
No independent end-to-end incident benchmark (levels 3–4 unestablished)
Passing structural gates does not validate retrieval entailment or physical event truth
